

CALDWELL APPLIED SCIENCE ACADEMY

“Caldwell Applied Sciences Academy stimulates the academic and professional development of students through rigorous instruction while fostering core ethical values.”

(Go to casa.caldwellschools.com for more information!)

The Advanced Technology Academy allows students to earn the following:

- Digital Media & Mobile Application Development (Associate in Applied Science Degree)
- Digital Media (Certificate)
- Mobile Application Development (Certificate)

In Digital Media, students learn graphic design, animation, audio production, video production, and web design. In

Mobile Application Development, students learn Apple's Swift programming language and Xcode software to develop apps for the iPad and the iPhone. Students use current and emerging standards and technologies such as Apple computers, Adobe Creative Suite, professional video and audio equipment, drawing tablets, mobile devices, and much more.

"Where students are encouraged to become producers of content rather than just consumers of content."

The Engineering Academy allows students to earn the following:

- Mechatronics (Associate in Applied Science Degree)
- Mechatronics (Certificate)

The Engineering Academy prepares students for the world of Mechatronics. This type of engineering focuses on the engineering and mechanical systems and also includes a combination of robotics, electronics, computers, telecommunications, systems control, and product engineering. Students develop problem solving, collaborative teaming, creativity, and independent thinking through highly engaging hands-on learning and activities.

The Health Sciences Academy allows students to earn the following:

- Associate of Science or Associate of Arts 2-year Transfer Degree

The Health Sciences Academy prepares students for health careers such as nursing, medicine, veterinarian, physical therapy, forensic science, and more. In this academy, students work collaboratively to complete experiments and solve problems to learn how the world affects the human body and other organisms. Through this process, students also learn how to think like scientists and use scientific equipment through hands-on inquiry activities.
